# Monthly Summary of Statistics

**New South Wales** 

#### NOTES

# SEASONALLY ADJUSTED INDICATORS

In most instances, the aim in compiling monthly or quarterly economic time series is to provide evidence of movement, in order to indicate the effects changing conditions are having on the activities being measured — and, in so doing, to signal what might be likely to occur in the near future. Seasonal adjustment is a technique designed to assist in these processes of analysis and interpretation by removing the estimated effects of normal seasonal variation from statistical series, so that the effects of other influences on the series may be more clearly recognised.

Details of the methods used in deriving the seasonally adjusted figures shown in this publication are given in the publication *Seasonally Adjusted Indicators* (Cat. no. 1308.0), last issued in 1983 by the Central Office of the ABS.

Seasonally adjusted statistics are revised following revision to the original data and as additional data are brought into the analysis each year.

For series where one of the components and the total of the components have been seasonally adjusted (e.g. private dwellings and total dwellings), any figures derived by deduction (in the example quoted — government dwellings) do not amount to a formally seasonally adjusted series for the balance of the components.

## SYMBOLS AND OTHER USAGES

kWh	kilowatt hour
L	litre
MJ	megajoule
n.a.	not available
n.e.c.	not elsewhere classified
n.e.s.	not elsewhere specified
n.p.	not available for publication but included in totals where applicable
n.y.a.	not yet available
r	figure or series revised since previous issue
*	subject to sampling variability too high for most practical purposes
	not applicable
_	nil or rounded to zero
	break in continuity of series (where a line is drawn across a column between
	two consecutive figures)
NOTE: N	Monthly Summary of Statistics preliminary figures are not indicated by the

INQUIRIES

For information about other ABS statistics and services, please refer to the back of this publication.

symbol 'p'. All revisions, however, will be indicated by the symbol 'r'.

Gregory W. Bray Regional Director New South Wales

<sup>(</sup>a) Excess of live births over deaths.

<sup>(</sup>b) For dates prior to June 1996, differences between the total increase shown and the sum of the natural increase and net estimated migration arise from retrospective adjustments to population estimates (which are made after each Census) to compensate for any intercensal discrepancy. A description of intercensal discrepancy is contained in the ABS information paper *Population Estimates: Concepts*, Sources and Methods (Cat. no. 3228.0).

<sup>(</sup>a) Statistics in this table relate to vital events which occurred in each quarter and year shown, and are registered up to the release of this publication. Because of late registrations, they are likely to be revised, particularly the most recent periods.

<sup>(</sup>b) Births and deaths statistics relate to events which occurred in Australia where the usual residence was within NSW.

<sup>(</sup>c) Deaths under one year of age.

 <sup>(</sup>d) Number per 1,000 of estimated resident population at 30 June, or number of infant deaths per 1,000 live births.

For footnotes see end of table.

NOTE: The tables on pages 7 to 11 contain estimates derived from the Monthly Population Survey which is conducted on a sample basis throughout Australia. Explanatory notes and a technical note about the estimates and further detailed estimates (including industry and occupation details) are contained in *Labour Force, New South Wales and Australian Capital Territory* (6201.1) which is issued quarterly and is available from the Sydney Office of the ABS.

<sup>(</sup>a) Period from the time the person began looking for work or was stood down to the end of the reference week. Period of unemployment is recorded in complete weeks and this results in a slight understatement of duration.

<sup>(</sup>b) Average duration is obtained by dividing the aggregate number of weeks a group has been unemployed by the number of persons in that group.

NOTE: The tables on pages 12 and 13 contain estimates derived from the Survey of Employment and Earnings, an Australia-wide employer-based survey. Explanatory notes are contained in Wage and Salary Earners, Australia (6248.0), which is issued quarterly and is available from the Sydney Office of the ABS. Estimates derived from the Survey of Employment and Earnings will differ from labour force estimates derived from the Monthly Population Survey for the reasons set out in the Information Paper Comparison of Employment Estimates from the Labour Force Survey and the Survey of Employment and Earnings (6263.0).

May	2.4	1.1	6.9	16.0
August	2.5	1.0	6.4	15.8

(a) Overtime is time worked in excess of award, standard or agreed hours of work for which payment is received. Overtime hours represent the number of hours of overtime paid for.

- (b) The figures shown are based on the last pay period ending on or before the third Friday of the month shown.
- (c) Calculated by dividing total overtime hours paid for in each group by the total number of employees in the same group.
- (d) Calculated by dividing total overtime hours paid for by the number of employees who were paid for overtime.
- (e) The number of employees who were paid for overtime as a percentage of the total number of employees.

<sup>(</sup>a) Working days lost refer to days lost by:

<sup>(</sup>i) employees who were directly involved in the dispute, and

<sup>(</sup>ii) employees who worked in establishments where stoppages occurred but were not themselves parties to the disputes; excluded is the time lost, as a result of the disputes, by employees in other establishments.

<sup>(</sup>b) Relates to industrial disputes involving a stoppage of work for a minimum of 10 working days, regardless of the length of the stoppage, for example, 80 employees on strike for one hour. Disputes are classified by industry according to the Australian and New Zealand Standard Industrial Classification (ANZSIC). Disputes prior to January 1994 are classified by industry according to the Australian Standard Industrial Classification (ASIC).

<sup>(</sup>a) Supermarket sales.

NOTE: Prices shown are the averages of prices for specified grades, qualities, brands, etc. charged by a number of selected retailers in Sydney. They should be regarded as no more than approximate indicators of price levels and price changes for the items concerned.

<sup>(</sup>b) From December quarter 1996 rice prices relate to long grain and are not comparable to previous quarters.

<sup>(</sup>c) Eggs in Sydney have a net carton weight of 700g per dozen.

NOTE: The Consumer Price Index is designed to measure quarterly variations in the level of retail prices for goods and services which represent a high proportion of the expenditure of wage and salary earner households. The index covers a large and representative selection of commodities and services arranged in eight major groups.

<sup>(</sup>b) Weighted average of eight capital cities.

<sup>(</sup>a) Base of each group index: 1989-90 = 100.0

#### NOTE:

- Each of the indexes shown on tables 15 and 16 are separate and
  distinct price indexes. The composition of the groups of each index is in
  accordance with materials usage in the class of building covered by that
  index. Further information regarding these indexes is published in *Price*Index of Materials Used in Building Other Than House Building, Six State
  Capital Cities (6407.0) and Price Index of Materials Used in House
  Building, Six State Capital Cities (6408.0).
- 2. As a result of measures in the 1997–98 Federal Budget to reduce ABS running costs, the frequency of compilation and publication of Indexes shown on tables 15 and 16 will be reduced from monthly to quarterly, thereby putting the statistics on the same frequency as the Consumer Price Index. The June 1997 Index numbers are the last monthly release. Commencing with the September quarter 1997, the indexes will be compiled and published on a quarterly basis.

<sup>(</sup>b) Weighted average of six State capital cities.

<sup>(</sup>a) The figures shown are estimates derived from a monthly survey of retail establishments. Excludes motor vehicle, boat and caravan dealers, service stations, smash repairers, tyre and battery retailers, bread and milk vendors, footwear repairers and electrical appliance repairers n.e.c. Retail establishments which do not have employees are excluded from the survey. Turnover includes retail sales, wholesale sales, takings from repairs, meals and hiring of goods; and commissions from agency activity (e.g. commissions received from collecting dry cleaning, selling lottery tickets etc.).

NOTE: The data contained in this table have been adjusted. See publication 8501.0 Retail Trade, Australia- July 1997, paragraphs 16 to 22 of the Explanatory Notes for further details.

<sup>(</sup>a) Includes motor cycle pillion passengers.

Source: NSW Road and Traffic Authority.

<sup>(</sup>c) Figures include only those injured persons admitted to hospital.

<sup>(</sup>b) Includes pedal cycle passengers, riders and drivers of animals, etc.

### For more information . . .

The ABS publishes a wide range of statistics and other information on Australia's economic and social conditions. Details of what is available in various publications and other products can be found in the ABS Catalogue of Publications and Products available from all ABS Offices.

#### **ABS Products and Services**

Many standard products are available from ABS bookshops located in each State and Territory. In addition to these products, information tailored to the needs of clients can be obtained on a wide range of media by contacting your nearest ABS Office. The ABS also provides a Subscription Service for standard products and some tailored information services.

#### National Dial-a-Statistic Line

0055 86 400

Steadycom P/L: premium rate 25c/20 secs.

This number gives 24-hour access, 365 days a year, for a range of important economic statistics including the CPI.

#### Internet

http://www.abs.gov.au

A wide range of ABS information is available via the Internet, with basic statistics available for each State, Territory and Australia. We also have Key National Indicators, ABS product release details and other information of general interest.
